

Okan picks Suffolk as general contractor for \$300 million Miami project

By [Adriana Valentina](#) October 10, 2018

Okan Group has selected **Suffolk Construction** as the general contractor for Okan Tower, a more than \$300 million mixed-use development in downtown Miami.

The 70-story architectural masterpiece is inspired by the silhouette of a tulip, Turkey's official flower, Okan Group said in a statement.

Located at 555 North Miami Ave., Okan Tower will be comprised of 149 condominiums ranging from one-to-three bedrooms, four exclusive penthouses, 236 condo-hotel units, and a 316-key Hilton Bayfront Miami hotel.

Amenities include high-speed elevators with separate access points for the various mixed-use components, a sky pool with panoramic views of the bay and city on the 70th floor, Hammam spa, state-of-the-art health and fitness center, multipurpose room, and outdoor lounge.

Additional features will be a playroom for kids, chef and gastro kitchen, a resident movie theater, and private area for owners with wine cellar and cigar room, as well as an activated rooftop restaurant on the 67th floor.

The project is slated to break ground before year's end.
